SUMMARY

Results-driven Full Stack Developer with expertise in building scalable web applications using the MERN stack and Next.js. Proficient in developing high-performance frontend interfaces and robust backend architectures. Committed to "Learning by Building," evidenced by a strong portfolio of e-commerce engines and utility platforms.

TECHNICAL SKILLS

Frontend: React.js, Next.js (15+), JavaScript (ES6+), Tailwind CSS, React Router, HTML5, CSS3
Backend: Node.js, Express.js, RESTful APIs, Mongoose, JWT/JWKS, Better Auth
Database & Tools: MongoDB, Zustand, Nodemailer, Git, GitHub, Postman, Vercel, Netlify

SELECTED PROJECTS

Rescume – Full Stack Pet Adoption Site 2026

Next.js 15, Express.js, MongoDB, Better Auth, JWT/JWKS

- Developed a high-performance adoption platform using Next.js 15 Server Components.
- Implemented complex authentication workflows using Better Auth and secure JWT handling.
- Engineered a responsive, real-time UI allowing users to adopt and post adoption pets.

Asta-Bazar – E-commerce Engine 2025 – 2026

Next.js, React, Tailwind CSS, Zustand, MongoDB, Nodemailer

- Architected a scalable e-commerce platform with a mobile-first design philosophy.
- Integrated Zustand for efficient global state management and a seamless shopping cart experience.
- Developed an automated order notification system using Nodemailer to streamline admin workflows.

EDUCATION & COURSES

Programming Hero — Full Stack Web Development 2026

Batch 13 Certification training focusing on industry-level full-stack paradigms.

Self-Taught Full Stack Web Development 2025 – Present

Intensive self-study focused on modern JavaScript ecosystems, system design, and API development with over 260+ contributions to open-source and personal repositories.
